

Introducing the NPL25 GL – Green Laser Compact Tactical Light

December 3rd 2024

The NITECORE NPL25 GL Green Laser Compact Tactical Light was officially released on December 3rd, 2024.

Precise aiming. Enhanced accuracy. Thanks to the excellent UHi 25 LED, the NPL25 GL is able to deliver a white, accurate, and clear lighting effect with an impressive output of 900 lumens and a long range of 216 meters, ideal for quickly identifying and responding to targets at mid-to-long range.

Precise green laser aiming. Besides the white light mode with two brightness levels, the NPL25 GL is equipped with a 520nm highly visible green laser, which can be activated separately or with the white light on, to help users to aim the target precisely and get everything under control.

Rapid battery removal and magnetic charging function. The NPL25 GL is powered by a 500mAh Li-ion battery, which can be removed by simply sliding the Battery Latch Lock and recharged via a magnetic connection.

Ambidextrous switch design. The NPL25 GL is designed with two tactical buttons to offer ambidextrously switching between triple modes and dual brightness levels. Moreover, the newly textured design of the buttons provides better touch and slip resistance.

Compact design with solidity and durability. Weighing only 74g (2.61 oz), the NPL25 GL is compact and lightweight in use. The aero grade aluminum alloy construction with HA III military grade hard-anodized finish makes the NPL25 GL solid and durable. The IPX6 rating, 2m impact resistance, and recoil-proof design further guarantee the stable and enduring output of the NPL25 GL.

Additionally, the NPL25 GL is compatible with Glock and Picatinny Rails by sliding the Rail Stopper to fit weapon rails of different sizes and to meet versatile user needs. The ATR (Advanced Temperature Regulation) module and the highly efficient constant current circuit (Non-PWM) also show NITECORE's consistent thoughtfulness in details. The NPL25 GL Green Laser Compact Tactical Light is definitely the unassailable tactical vanguard.
