

FOR IMMEDIATE RELEASE

The #1 Gunsmithing product on Amazon, with 1,000+ 5 star reviews – Rocksett™ by Flexbar will be at the SHOT Show for the 1st time.

DATE: 1/1/26

TO: Industry Partners, Media Representatives, and Attendees of SHOT Show 2026

FROM: Louis Valenti, Sales Director, Flexbar Machine Corporation

Islandia, NY — Flexbar Machine Corporation is thrilled to announce that Amazon's #1 Gunsmithing product, **Rocksett™**, is finally coming to the 2026 SHOT Show in Las Vegas, Nevada!

Rocksett™ is the perfect adhesive for threaded firearm components. No mixing or priming, this one part adhesive doesn't even need heat to cure!! Put **Rocksett™** on the threaded components of your firearm for superior adhesion coupled with vibration resistance and heat resistance. The best part, is that when you're ready to take your firearm apart to clean it – a simple hot water soak breaks down **Rocksett™** and allows for you to easily unscrew the components. No heating the assembly or applying high torque to break the glue bond that you'd find in other adhesives. All of this makes **Rocksett™** the number one Gunsmithing product on Amazon. Join the thousands of satisfied users who have made **Rocksett™** a staple in their toolbox. Come visit **Rocksett™** at the Shot Show for the first time!!!!

We invite all attendees to swing by our booth and grab a sample. The first one is on us – after that we know it will be the only way you glue parts on your firearm again.

Come get your free sample:

- **Where:** SHOT Show 2026, **Booth # 43852** (Venetian Expo, Level 1)
