

Wild Land's Pickup Mate: The Hunting Rig Upgrade You've Been Waiting

Meet the Wingman X—a full-season basecamp that sets up in minutes. No drill. No drama. Just more time doing what you love. Tired of rigging your truck with piecemeal add-ons that just make things more complicated? Wild Land's **Pickup Mate**—featuring the flagship **Wingman X**—is the **fully integrated hunting basecamp system** you need. Engineered with a patented frame, tough tech-fabric, and smart-ready power, it's built for all-weather reliability and instant deployment. The Quick-Mount system delivers true “**back-in-and-go**” performance—solo setup or teardown takes just minutes.

Here's how it transforms your hunt:

- **360° Elevated Hunting Perch + Rest Zone:** The second-floor panoramic sky window gives you a **bird's-eye view** for spotting game—a true overhead outpost. Below, a dedicated sleep pod lets you rest up and recharge between sessions, supporting **all-day or overnight hunts** without leaving the field.

- **Gear-Ready, No-Clutter Storage:** The first-floor space keeps rifles, ammo, and field equipment organized, secure, and out of the elements. It's your go-to **pre-hunt staging area**, so you're always minutes from being ready to move out.

- **Zero-Drill, Road-Legal Build:** Unlike custom mods that can hurt your truck's value, the Wingman X uses **non-invasive mounting**—no drilling, no permanent changes. The closed profile stays within legal dimensions, so you avoid oversized hazards on and off the road

- **One-Touch Basecamp Deployment:** With powered lifting and one-touch automation, you can set up a full two-story base in minutes. That's **more time hunting**, less time fiddling with gear.

Kick tires? No—kick off your next hunt with confidence.

Visit Wild Land at SHOT Show 2026 to see the system in person.
