MARK37 Unveils New Ghost Phone Lineup on Pixel 9 Series, Powered by GrapheneOS

Spartanburg, South Carolina – December 1, 2025 — MARK37, a leader in privacy-first technology, today announced its next-generation Ghost Phone lineup built on the Pixel 9 series and powered by GrapheneOS. Available on the Pixel 9a, Pixel 9 Pro, and Pixel 9 Pro XL (along with many other models), the new Ghost Phones combine flagship hardware with a hardened, privacy-first operating system to deliver digital sovereignty out of the box.

“Digital sovereignty shouldn’t be a luxury—it should be the standard,” said Sean Patrick Tario, Co-Founder and Chief Privacy Advocate at MARK37. “By pairing GrapheneOS with the Pixel 9 series, we’re offering a secure, high-performance platform that makes privacy accessible, intuitive, and powerful for individuals, professionals, and mission-driven teams.”

What’s New in the MARK37 Ghost Phone (Pixel 9 Series)

- Built on GrapheneOS: A hardened, privacy-respecting operating system for Pixel devices featuring enhanced sandboxing, exploit mitigations, and rigorous permission controls.
- Secure-by-default setup: Minimal telemetry, verified boot, strong encryption, and curated app sources to reduce attack surface from day one.
- Performance without bloat: Streamlined configuration for speed, battery life, and reliability—no trackers or unnecessary services.
- Precision controls: Granular toggles for sensors, network, location, and permissions to keep data on your terms.
- End-to-end support: Personalized onboarding, migration, education, and ongoing updates from the MARK37 team.

Choose the Right Fit for Your Mission

- Pixel 9a: Accessible, durable, and efficient for essential workflows.

- Pixel 9 Pro: Flagship performance with advanced camera and display.
- Pixel 9 Pro XL: Expanded battery and screen real estate for power users and field operations.

Made for Real-World Autonomy

- Private communications: Options for encrypted calling, messaging, and file sharing without invasive platforms.
- App freedom: Privacy-centric app ecosystem compatibility and flexible sideloading with strong sandboxing.
- Rapid team deployment: Enterprise-ready provisioning, optional device hardening profiles, and policy templates.

“Whether you’re an individual or an organization, our Ghost Phones let you operate confidently without Big Tech lock-in,” Tario added. “Stop by our SHOT Show 2026 booth (40864) to see the lineup in action and discover how advanced technology—paired with personalized training and support—can empower you to reclaim your digital sovereignty.”
