

## Press Release

### Evolve Range Solutions Introduces Innovative Target Systems for Indoor Ranges and Disrupts the Industry

**Vandalia, OH** — Evolve Range Solutions®, a family-owned company, is revolutionizing the shooting range industry by offering cutting-edge target systems designed to meet the evolving needs of modern firearms retailers and range operators. Drawing on their experience as owners of NSSF 5-Star facilities, the Evolve Range Solutions® team delivers unparalleled expertise in range operations and offers innovative solutions for both current and prospective firearms store owners.

Evolve Range Solutions® is excited to introduce three new and updated products: the **EV-R® Target System**, the **EV-1® Advanced Target**, and the **Sentinel™ Outdoor Target**.

#### EV-R® Target System

The **EV-R®** is a groundbreaking target system that integrates the latest in video, digital, and gaming technologies to provide an immersive shooting experience. Designed to attract a new generation of enthusiasts to the shooting sports, this proprietary system has no equal in the industry. Shooters can fire live ammo at targets that react and score automatically without the need for attachments or lasers. The system's advanced hit-detection technology is so precise, it even works with Airsoft. Users can view their targets and leaderboard scores directly on their smartphones. Additionally, the user interface has been simplified for 2023, making sign-in faster and more seamless than ever.

#### EV-1® Advanced Target

The **EV-1® Advanced Target** utilizes pre-printed targets mounted on a roll, which are advanced via our patented stand and motorized unit. This affordable system allows shooters or range officers to advance to a fresh target at the push of a button—eliminating the need for cease-fires to change targets on indoor pistol or rifle ranges.

#### Sentinel™ Outdoor Target

The new **Sentinel™ Target System** is designed for outdoor use, offering weather-resistant targets on a roll. This durable system includes remote-control target advancement, with a range of up to 1,000 yards. Initially developed for military applications, the Sentinel™ system is easily adaptable for civilian use on shooting ranges.

#### Mission Statement

At **Evolve Range Solutions®**, our mission is to provide forward-thinking, seamless solutions for shooting-range design, construction, and operation. In addition to our innovative target systems, we offer comprehensive expertise to help you design and build your facility from the ground up. Whether you're retrofitting an existing facility or building a new one, our solutions reduce both your space and equipment requirements by up to 50% while lowering ongoing operational costs.

Our **EV-R® Target System** and **EV-1® Advanced Target** integrate the latest technology to enhance your range, while cutting down on your facility's footprint and operational overhead. The Evolve Range Solutions® approach is designed by range owners, for range owners—specifically to address the needs of the next generation of target shooters. Our solutions combine traditional live-fire shooting with modern gaming, training, and technology, creating a dynamic experience that appeals to younger audiences.

**Evolve Range Solutions®** — designed for range owners, by range owners.
