

## Phalanx Industries to Unveil DSKL8R® at SHOT Show—A New Standard in Non-Lethal Disruption and De-Escalation

**DENVER, CO — December 15, 2025** — Phalanx Industries today announced the official debut of DSKL8R®, a patented non-lethal disruption device engineered to de-escalate confrontations without force. Purpose-built for law enforcement, military operators, security professionals, and first responders who demand a decisive edge, DSKL8R marks a defining evolution in tactical control—combining overwhelming light and sound to disorient hostile or combative threats.

Where traditional illumination tools end, DSKL8R begins.

DSKL8R delivers immediate disruption through a proprietary fusion of 2,400-lumen blinding light and 105dB audio sequences, overpowering an aggressor's senses and creating immediate disorientation. The result: critical time and space regained, restoring control in the moments that matter most.

*"I wish we would have had this device when I was in the field, as it would have provided additional proactive use-of-force options."*

— **T.F., Retired FBI SWAT Field Office Team Leader**

DSKL8R represents the future of non-lethal technology:

- Non-lethal dominance without lethal force
- Fast, controlled disruption in chaotic environments
- A proactive tool to save lives, protect careers, and reduce litigation risk

"Every piece of gear you carry should give you an unfair advantage and confidence. Otherwise, what's the point," said Scott Southworth, CEO of Phalanx Industries and creator of DSKL8R. "DSKL8R is precision-built, field-tested, and mission-ready. It doesn't just illuminate a threat—it disrupts their behavior and breaks the cycle."

### Unmatched Performance in a Compact Platform

Never has this level of non-lethal disruption been packed into such a tough, compact device. Engineered for extreme conditions and unpredictable encounters, the DSKL8R is built to perform when failure is not an option.

### DSKL8R Technical Specifications:

- **Flashlight Mode:** 1,300 lumens
- **Flashlight Runtime:** 3+ real hours
- **Disrupter Mode:** 2,400 lumens + 105 dB siren
- **Power:** 5,000 mAh USB-C rechargeable Li-ion battery
- **Durability:** IPX7 waterproof (1 meter)
- **Drop Survival:** 2 meters
- **Operational Temperature:** -22°F to 122°F

DSKL8R is more than a tool—it's a tactical shift. A device created for those who cannot afford hesitation, uncertainty, or escalation. SHOT Show attendees can experience the DSKL8R® firsthand at booth #40528, where live demonstrations will be available throughout the event.

If you want a flashlight, buy a flashlight.  
If you want the ultimate edge—you carry DSKL8R.
