

## NEW QUANTUM ELITE RIFLESCOPES FROM LUNA OPTICS

Luna Optics presents our newest line of riflescopes, consisting of 4 models as the latest in digital night vision technology offering 4K image sensors and organic LED image displays! Experience HD video recording and industry-leading 16.1MP still image capture as well as ability to transition between Full-Color Image and super light sensitive Black & White, Night Vision Green Phosphor, White Phosphor and state-of-the-art Amber image options!

Utilizing Quantum Elite UHD CMOS sensors with 2880x2160 active pixels, combined with precision all-glass optics featuring either 35mm lens with 3.5x-21x magnification or 50mm lens with 6x-36x magnification. New organic LED displays ensure reliable operation at temperatures as low as minus 22F. Super powerful projector-style IR illuminator with adjustable beam width and brightness allows users to see bright and vivid images at the distances other digital products simply cannot match! Save video and still images on a removable Micro SD card (32GB card is included – upgradeable up to 512GB).

Models LN-QE-RS35-LRF and LN-QE-RS50-LRF come with fully integrated Laser Rangefinder with effective measuring distance of up to 1200m (1308yds).

Advance features include auto intelligent picture optimization and manual brightness control as well as Wi-Fi connection to iOS and Android mobile devices via commonly available app. Each scope comes with 5 digital reticle options (each available in 7 colors) with quick electronic zeroing system and up to 25 custom user profiles allowing zeroing on a variety of rifles and at different distances.

Each unit comes with a deluxe carry case, QD Picatinny mount, 32GB Micro-SD card, USB-C and HDMI cables.

LN-QE-RS35 is currently available to ship with MSRP \$849.95  
LN-QE-RS35-LRF is also available to ship with MSRP \$949.95  
LN-QE-RS50 is currently available to ship with MSRP \$899.95  
LN-QE-RS50-LRF is also available to ship with MSRP \$1,049.95
