

Audacious Concept Introduces Fanglet - A Compact Fixed Blade Built for Everyday Carry

Audacious Concept presents **Fanglet**, a compact fixed blade knife designed for everyday carry where size, control, and reliability matter most.

Fanglet is built around a **MagnaCut steel blade**, offering an optimal balance of edge retention, corrosion resistance, and toughness. With a total length of just 159 mm and a slim trailing point blade, Fanglet delivers precise cutting performance in a minimal footprint.

The knife is paired with a purpose-built **Kydex sheath**, featuring IWB soft loops, eyelets for multiple carry options, a drainage hole, and a thumb ramp for fast, controlled deployment. Subtle glow-in-the-dark inserts in a titanium frame add low-light visibility without compromising the clean design.

Fanglet is available in multiple handle configurations, including G10, canvas Micarta, and Ultem, each matched with a distinct blade finish.

Designed and produced by Audacious Concept, Fanglet reflects the brand's focus on functional minimalism, premium materials, and real-world usability.
