

## FOR IMMEDIATE RELEASE

### Schmid Tool & Engineering Showcases Proven Operational Excellence at SHOT Show

**Las Vegas, NV - SHOT Show 2026** - Schmid Tool & Engineering, a precision CNC machining partner serving the defense industry, will exhibit at SHOT Show as a trusted supplier known for disciplined operations, structured processes, and consistent execution in highly regulated environments.

With over 80 years of manufacturing experience, Schmid Tool & Engineering supports defense customers with precision-machined components produced under rigorously controlled processes. The company recently completed its **AS9100D audit and achieved certification**, further reinforcing the operational systems already in place to manage quality, risk, and traceability across complex programs.

Schmid Tool & Engineering maintains a **0% Department of Defense rejection rate**, a performance metric that reflects the company's commitment to process control, documentation accuracy, and repeatable manufacturing outcomes. In addition to AS9100D, Schmid Tool & Engineering is also **ISO 9001:2015 certified**, supporting customers who require dependable compliance across defense and advanced manufacturing applications.

“Defense manufacturing isn’t about making announcements, it’s about doing the work right, every time,” said Heidi Schaefer, Owner at Schmid Tool & Engineering. “Our focus has always been on building organized systems, disciplined workflows, and a culture that delivers consistent results. SHOT Show gives us the opportunity to connect with partners who value that level of execution.”

At SHOT Show, Schmid Tool & Engineering will engage with defense and firearms industry partners seeking a machining supplier capable of managing tight tolerances, structured quality requirements, and long-term program support.

**SHOT Show attendees are invited to visit Schmid Tool & Engineering at Supplier Showcase Booth #52421** to learn more about the company's capabilities, processes, and approach to defense manufacturing support.
