

JL Billet Launches “The Reaper” – A PDW Chassis System for the SIG P365

FOR IMMEDIATE RELEASE

Gallatin, TN — JL Billet, a precision firearms manufacturer known for uncompromising quality and American-made craftsmanship, announces the release of The Reaper, a new 7075 Billet Aluminum PDW (Personal Defense Weapon) chassis system designed for the SIG P365 Fire Control Unit. Built to bridge the gap between a traditional handgun and a compact PDW, The Reaper delivers increased capability, improved accuracy, and enhanced control—without sacrificing portability or simplicity.

At the core of The Reaper’s performance is a third point of contact, provided through a manual, deployable stabilizing brace, allowing shooters to maintain greater control and accuracy in dynamic scenarios. During live-fire demonstrations, users of varying experience levels were able to confidently engage difficult shots with ease—highlighting the system’s intuitive design and effectiveness.

Machined from 7075 Billet Aluminum, The Reaper chassis offers exceptional durability while maintaining a compact footprint. It accepts OEM magazine releases and integrates seamlessly with the SIG P365 FCU, preserving the familiarity shooters already trust. Designed for personal defense and high-mobility use cases, The Reaper provides more capability than a handgun alone, while remaining ultra-maneuverable, portable, and discreet.

Key Features:

- Compatible with SIG P365 Fire Control Unit
- Manual deployable stabilizing brace for a third point of contact
- Improved accuracy and control
- Ultra-compact PDW-style platform
- OEM magazine release compatibility
- Designed for real-world personal defense applications

The Reaper will launch initially as a standalone chassis, with full build options available through JL Billet. JL has plans for future Reapers for the RXM and Echelon pistols.

About JL Billet

JL Billet is an American firearms manufacturer specializing in precision-machined components built to exacting standards. With a commitment to quality, performance, and craftsmanship, JL Billet designs products that stand up to real-world use—without compromise.
