ELEVATED EVERYDAY CARRY

ocasoknives.com

LUCENT[®] AUTOMATIC OTF

The Lucent, designed by Andrew Demko, is a dual-action out-the-front automatic built for fast, effortless deployment in a lightweight, stylish package. The slim 6061-T6 aluminum handle features an elegant cross-hatch pattern that offers a secure grip, while jimping on the top and underside of the handle ensure a firm hold during blade release and retraction. The blade is made from premium Böhler M390 steel for exceptional edge retention and corrosion resistance. For compact carry, the Mini model features a California-legal 1.9" blade and weighs just 1.5 ounces, while the Large boasts a striking 3.5" harpoon-style blade.

The design thoughtfulness is carried through to the ambidextrous deep-carry pocket clip, which wraps around the handle for a modern, sleek appearance. In your pocket this knife looks about as modest and unassuming as possible.

Weight: 1.5 oz (Mini) 2.2 oz (Large)
 Blade Length: 1.9" (Mini) 3.5" (Large)
 Overall: 4.7" (Mini) 7.9" (Large)

Steel: Böhler M390
 Handle: 6061-T6 Aluminum
 Made In: Parts by Bestech (China)
 assembled in California

SEE IT IN ACTION

Available in four anodized handle finishes and two sizes.

Note: The Lucent cannot be shipped to MN, NY, or D.C. Large models cannot be shipped to CA (the Mini is legal in CA). Cannot be shipped to P.O. boxes or APO addresses.

NEW / DAMASTEEL SOLSTICE®

The Damascus Solstice returns with a striking new look, outfitted with an eye-catching Damasteel® blade and paired with ultra lightweight Fat Carbon® handle scales. The liner lock and stainless steel caged bearings deliver quick, smooth action. Polished hardware and our signature ambidextrous fold-over stainless steel deep carry pocket clip complete the look of this one of a kind knife. Made in Maniago, Italy, in the "city of knives", where centuries of high-quality knife craftsmanship and the latest technology meet.

MATERIALS THAT MATTER

Damasteel®

Made in Sweden, Damasteel® elevates the art of pattern-welded Damascus through a patented powder metallurgy process. Featuring DS93X™ Damascus in the intricate Bifrost pattern - over one hundred layers of two stainless steel grades. After heat treatment, the steel attains exceptional corrosion resistance, edge sharpness, and toughness, delivering both striking aesthetics and uncompromising performance.

Fat Carbon®

A durable, lightweight carbon fiber composite produced in Lithuania, Fat Carbon® offers superior strength and stability with a refined, luxurious aesthetic. The "Space Coral" composite is made from carbon fiber, epoxy resin, and copper, cured under high pressure resulting in patterns that are unique to each piece. "Black Dunes" is forged from 70% carbon fiber and 30% epoxy resin, with unique swirls and concentric rings that catch the light.

NEW / SOVRANTO® SLIPJOINT

Slipjoint pocket knives are among the oldest knife designs in the world, and with the right construction and materials, an elegant, functional slipjoint is a true gentleman's accessory. In collaboration with custom knifemaker Mike Wallace, we've spent the past two years perfecting a slipjoint design with a clear mission: to create a simple, stylish, and versatile knife that's legal to carry in as many places as possible.

Classic SLIPJOINT DESIGN

Made in Maniago, Italy and featuring a 2.75" MagnaCut steel blade, a compact Titanium handle, and smooth "walk and talk" function with a solid half-stop and satisfying, secure close. The signature fold-over ambidextrous pocket clip can be replaced with an included "clip-cover" for those times when you want to carry this knife clipless and as compact as possible.

With a blade under 3" in length, our modern interpretation of the classic non-locking slipjoint design is safe and legal to carry in many places where locking knives are restricted.

LEARN MORE

Sovranto Slipjoint \$199.99 15SJS

Weight: 2.0 oz / 57g
Blade Length: 2.75" / 6.9cm
Blade Thickness: 2.5mm
Handle: 3.5" / 8.9cm
Overall: 6.375" / 16.2cm
Steel: CPM MagnaCut

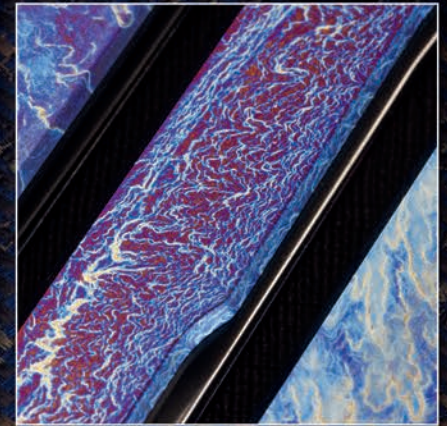

ANODIZED TITANIUM SOLSTICE®

Our Titanium Solstice is available in an anodized finish that turns this already incredible knife into a work of art. Custom finished using an "entropic" anodizing style, the complex, random patterns and striking coloration evoke the look of lightning or nebulas. No two knives are alike, making them ideal for collectors or anyone who wants something truly special for their everyday carry.

WHAT IS ENTROPIC ANODIZING? The anodizing process combines the use of heat and ferric acid to create a swirled patterned oxide layer on the surface of titanium. The resulting finish is sometimes called "entropic anodizing" in reference to entropy, the state of randomness and disorder of matter. The oxide layer formed during the anodizing process is extremely durable and won't wear off.

Anodized w/ Satin blade \$259.99 10DBS
Anodized w/ Black blade \$269.99 10DBB

Available with Harpoon or Wharncliffe blade by request

Weight: 2.5 oz / 71 g
Blade Length: 3-1/2" / 9 cm
Thickness: 0.125" / 3.2mm
Overall: 7-7/8" / 20 cm
Lock Type: Liner Lock
Made In: Taiwan, anodized by Way of Knife in Michigan

Please note - due to the nature of the anodizing process, each knife is unique and we cannot guarantee an exact pattern or color (color ranges from blue to purple).

ENGRAVED TITANIUM SOLSTICE

Our Titanium Solstice has been customized in two laser engraved patterns: a finely detailed, traditional western scroll and a modern design highlighting the flowing contour lines of topographic maps. The intricate patterns and clean, modern design make these knives a unique addition to any collection.

DESIGNED FOR DISTINCTION

Engraved models are available in your choice of a black PVD-coated or satin-finished blade and feature the same premium USA CPM S35VN steel, Titanium handle, stainless steel caged bearings and ambidextrous deep carry pocket clip as the original Solstice. Available with a Harpoon or Wharncliffe blade by request.

The STRATEGY®

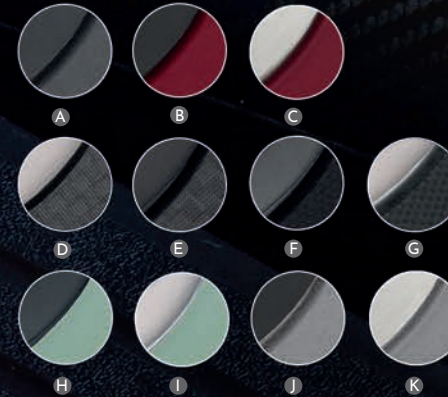

The Strategy is lightweight, durable, compact, and comfortable enough to be carried into the office or ready for off-grid adventure. The 3.5" clip point blade is made from Böhrler K110 (D2) steel for outstanding edge retention and toughness, with an ergonomic handle designed for ideal comfort and grip, made from optional high-strength G-10 milled scales, peel-ply Carbon Fiber/G-10, or 6061-T6 aluminum. The Strategy is outfitted with our signature ambidextrous fold-over deep carry clip and stainless steel caged bearings with flipper opening for incredibly smooth and rapid deployment.

TITANIUM & S35VN

Upgrade to premium CPM S35VN steel and high-strength Titanium. S35VN is a USA made, high-end stainless steel that provides an excellent balance between toughness, corrosion resistance, and edge-retention. It is recognized as a premium steel due to its durability and remarkable wear resistance.

Something *Different* for your desk

Effortlessly open letters and packages while elevating your deskscape with a piece of functional art. Our Duo Desk Knife features two symmetrical chisel ground knives held together with neodymium magnets. Both a conversation piece and a multi-purpose tool, the knives snap together and apart with ease and can function as a letter opener, box cutter, and even scissors. Each individual knife is the optimal thickness for daily desktop cutting tasks. A walnut and stainless steel stand is included to elegantly display your knives and keep them in easy reach.

HOW IT WORKS

The secret is in the magnets and the circular pivot design. To separate the knives, spin one side of the knife from the base of the handle. To reattach, align the center handle pivot and spin the handles back into alignment.

Duo DESK KNIFE

Weight (knives): 3.0 oz / 85 g
Weight (stand): 4.4 oz / 125 g
Blade Length: 2-3/4" / 7 cm
Overall: 5-1/2" / 14 cm
Thickness: 0.15" / 3.8mm (each)
0.30" / 7.5mm (together)
Steel: Japanese 420J2 Stainless Steel

Wharncliffe \$149.99 80DKW
Spear Point \$149.99 80DKS

Warning: Blades are very sharp. Always maintain awareness of the cutting edges. Exercise caution when separating, handling or using the blades. This is not a toy; keep out of reach of children. This product contains neodymium (rare earth) magnets and may affect internal medical devices (such as pacemakers). Keep away from electronic devices.

BIG & DESIGN® TITANIUM MINI PEN

Made in collaboration with our friends at Big Idea Design, the Titanium Mini Pen accepts type D1 refills and weighs just 1/2 an ounce. Measuring 3.25" long, it's made from machined titanium for a sleek, durable finish. The smooth twist mechanism features our signature icon for a refined touch, and each pen comes with a grade 5 titanium bead. Available in stonewash or black DLC, this compact pen pairs seamlessly with our EDC Wallet.

About OCASO®

We believe a well-designed, well-made knife is like a piece of functional art. Our mission is to design and craft knives and everyday carry accessories with a focus on luxury, fit and finish, and the performance to match their good looks. We use premium materials to create sophisticated, versatile, distinctive pocket knives that are a reflection of your personal style.

Ocaso was founded in 2022 and is based in Ojai, CA. Contact us if you have any questions, concerns, or just want to talk about knives. We're happy to hear from you.

LIFETIME WARRANTY

We stand behind our products 100%. All Ocaso® knives and accessories carry a limited lifetime warranty. If one of our knives ever breaks or fails because of a material or manufacturing defect, we'll repair or replace the knife.
