

Active Violence Immediate Response Training

Active violence and mass casualty events are happening daily. **Active Violence Immediate Response Training (AVIRT)** provides your team with lifesaving knowledge and skills so they can react quickly in a violent or emergency bleeding situation.

Why AVIRT?

AVIRT uses straightforward and effective strategies to teach you how to survive and become an immediate responder in active shooter and emergency bleeding situations. Developed by law enforcement, security, medical and training experts with first-hand experience, the program combines lifesaving medical techniques with tactical response skills. This hands-on, interactive training provides dynamic scenarios and team-building exercises that everyone can successfully complete.

Protect Your People, Protect Your Brand

In an active violence incident, employers are responsible for protecting both employees and customers. Beyond the tragic loss of life, failure to maintain a safe workplace — required under laws like the U.S. Occupational Safety and Health Act (OSHA) of 1970 — can result in severe legal and financial consequences. Many businesses never recover after an active shooter event due to lawsuits, reputational damage, victim care costs, and other expenses.

Course Overview

Through innovative training and products, we give corporations and organizations the tools to strengthen their safety programs. Once reserved for first responders, the lifesaving skills taught in AVIRT have been adapted for the public. In just two hours, our hands-on training equips participants to become immediate responders during an active violence event. AVIRT emphasizes training in:

- Warning Signs and Situational Awareness
- Escape, Evade, Attack and Active Shooter Response Procedures
- Emergency Techniques to Stop the Bleed

“I was very impressed with the level of knowledge and professionalism that AVIRT provided and I recommend this training for all those involved in public and private policing or security.”

David P. Chase, Regional Training Manager-Midwest, Allied Universal Security Services

“Your training was by far one of the best I have ever attended as a law enforcement officer and member of the sports & entertainment venue security field.”

Barry R. Stanford CPP®, CSSP, Senior Director of Security Operations and Intelligence, AEG Worldwide

TAC+PAC

During an AVIRT class, participants learn to use the TAC+PAC bleeding control kit. The portable TAC+PAC includes everything you need to stop bleeding, anywhere you go. Unlike other first aid kits, the TAC+PAC contents never expire and are free from allergens.

“The active shooter scenario training has been received very positively by our staff. At an age appropriate level our staff feel empowered to ensure the safety of their students.”

Dr. Todd R. Robinson, Superintendent, Romeo Community Schools, Romeo, MI

Become an AVIRT Instructor

Become an Authorized AVIRT Instructor and bring lifesaving skills to your community or organization. Our 1-day Instructor Development Course is offered nationwide and provides everything you need to start teaching AVIRT.

AVIRT Class Topics
