

Never Shoot The Same Target Twice

TAG (Threat Analysis Group) is your premier source for unique positive threat identification training targets. Our mission is to enhance training realism and effectiveness by leveraging advanced AI technology to create custom uniquely generated targets for every training session or scenario.

Threat Targets | Non-Threats | Hostage Situations

We can provide an infinite variety of threat, non-threat and hostage targets, enhancing the complexity and realism of training exercises. This helps trainees develop discernment skills in high-pressure situations, reducing the chances of friendly fire and collateral damage.

MALE	HANDGUN	YOUNG	CAUCASIAN
FEMALE	GRENADE	TEENAGER	MIDDLE-EASTERN
	KNIFE	MIDDLE-AGED	ASIAN AFRICAN
	+21	OLD	HISPANIC
RANDOMIZE			

Choose the Target's Characteristics
Every target is custom generated, preventing the memorization of specific images and promoting true threat recognition skills. Choose between characteristics such as gender, race, age, nationality, attire and weapon type.

Advanced Close Quarters Battle Training

TAG Targets are designed to take close quarters battle (CQB) training to the next level. Our AI-generated targets are ideal for:

Military Training

Enhancing the readiness and responsiveness of soldiers in various combat scenarios, improving positive threat identification.

Police Training

Equipping law enforcement officers with the skills needed to handle diverse and unpredictable threats, and train to identify non-threats.

Warfighter Training

Preparing warfighters with realistic and challenging training environments to improve their tactical decision-making and reduce blue-on-blue incidents.
