

SHAW ARMAMENT REVEALS THE AZIMUTH GRT SUPPRESSOR AT SHOT SHOW 2026

NEWEST 3D-PRINTED SILENCER DELIVERS THE DURABILITY, FLOW-THROUGH PERFORMANCE, AND PRECISION YOU'VE COME TO EXPECT

LAS VEGAS, NV – January 20, 2026 – Shaw Armament, a leader in precision firearm manufacturing and advanced suppressor technology, has announced the official launch of the **Azimuth GRT**, the latest evolution in its hard-use suppressor lineup. Engineered with advanced Gas Reduction Technology (GRT), the Azimuth GRT sets a new benchmark for low backpressure, full-auto durability, and shooter safety at this year's SHOT Show.

Like all Shaw Armament products, the **Azimuth GRT** redefines expectations for duty-grade equipment. At **6.8 inches** in length and weighing **16.3 ounces**, it balances robust construction with manageable swing weight. The suppressor features a **1.62-inch** diameter to maximize internal volume and is constructed entirely from **Inconel 625** using monolithic DMLS (Direct Metal Laser Sintering) 3D-printing technology. This joint-free design ensures unmatched durability under the most rigorous firing schedules.

Designed to handle the abuse of **5.56x45mm** platforms without barrel length restrictions, the Azimuth GRT delivers unparalleled reliability. Its proprietary **Gas Reduction Technology (GRT)** utilizes a coaxial blast chamber to vent expanding gases into an outer path, drastically reducing backpressure and toxic blowback to the shooter. The forward-venting front cap further ensures gases are directed away from the operator while maintaining top-tier sound suppression.

The suppressor incorporates industry-standard **HUB compatibility (1.375x24)**, providing effortless mounting versatility with a wide range of existing muzzle devices and QD systems. It ships with a 1/2x28 direct thread mount, ensuring the Azimuth GRT integrates seamlessly with your rifle right out of the box.

The **Azimuth GRT** is available now for order by dealers and distributors attending SHOT Show 2026.

About Shaw Armament Based in Powder Springs, GA, Shaw Armament specializes in precision manufacturing and suppressors, delivering cutting-edge solutions for military, law enforcement, and civilian shooters.
