Brunton Showcases Expanded Military Navigation Lineup at SHOT Show

Riverton, WY. Brunton, a precision navigation company founded in 1894, will exhibit in the SHOT Show Main Hall, with increased exposure for its U.S. mil-spec navigation instruments. The display includes the Brunton H-3 and Model 94 lensatic compasses, along with the M2 Military Transit and the new M2i, an illuminated version of the M2.

The H-3 and Model 94 lensatic compasses are built and assembled in Riverton, Wyoming. Both models expand Brunton's military lineup, which includes the M2 Military Transit. All models meet Buy America Act requirements and align with government procurement standards. Design priorities include resistance to sand, moisture, shock, and temperature extremes.

The Brunton H-3 features tritium illumination for constant visibility without an external light source. This illumination supports navigation during night operations, enclosed environments, and power-restricted conditions.

The Brunton Model 94 uses phosphorescent illumination and shares the same mechanical and optical design as the H-3. This model offers a lower-cost option while maintaining strong low-light visibility after light exposure.

Brunton will also feature the new M2i, an illuminated version of the M2 Military Transit. Brunton has supplied the M2 to the U.S. Military since 1911, marking more than a century of continuous service. The M2 platform remains a trusted precision instrument for artillery, forward observation, and land navigation.

Brunton operates as an SBA-certified Woman-Owned and HUBZone Small Business. Manufacturing and assembly remain based in the United States.

A portion of proceeds from select military compass sales supports Disabled American Veterans.

Visit Brunton at SHOT Show Main Hall, Booth #14349.

About Brunton

Founded in 1894, Brunton specializes in precision navigation tools built for reliability and accuracy. Based in Riverton, Wyoming, Brunton inspires, educates, and supports those who seek direction in their professional and outdoor pursuits.
