

German Innovation Meets American Utility: New heat it™ pro with Nite Ize® G-Series™ Carabiner Launches at SHOT Show 2026

LAS VEGAS, NV

The collaboration brings together two industry leaders: heat it™, known for its precision German engineering and hyperthermic treatment technology, and Nite Ize, a leading manufacturer of innovative, solution-based products.

“Last year was about introducing the concept; this year is about the perfect execution,” says Lukas Liedtke, founder and CEO of heat it™. “By partnering with Nite Ize, we’ve created the ultimate outdoor companion. We are combining our chemical-free medical technology with a world-class fastening system to ensure relief is not just in your pocket, but securely accessible at a moment’s notice.”

Elevating the Outdoor Experience

The new heat it™ pro remains the compact, smartphone-powered solution that more than 1,500,000 users worldwide trust to treat itchy mosquito and insect bites. The addition of the Nite Ize G-Series Carabiner takes its utility to the next level:

- **Secure Dual-Chamber Design:** The G-Series carabiner features two distinct chambers, allowing users to clip the heat it™ to the first gate of the carabiner, pass it through the inner gate to secure, and clip the first chamber to a pack or belt loop, ensuring the device stays attached during rugged activity.
- **Ready for the Field:** Designed for hunters, anglers, and sportsmen, this combination ensures that the device is always within reach for rapid, hyperthermic relief—no batteries or chemicals required. Totally scent-free.
- **Precision Treatment with BiteLight:** For the first time, heat it™ pro introduces the innovative BiteLight technology (patents pending). This integrated illumination allows for effortless, precise application even in total darkness.
- **Transatlantic Synergy:** This partnership highlights a shared commitment to durability, innovation, and smart design between German engineering and American outdoor culture.

Visit Us at SHOT Show 2026

Attendees are invited to experience the synergy of the heat it™ pro + Nite Ize G-Series Dual Chamber Carabiner firsthand. Live demonstrations will be held throughout the show, showcasing how this small device uses concentrated heat to provide instant relief from pain and itching. Pro Deals available at the booth.

- Location: Booth 41820, Palazzo Ballroom, 5th Floor, Venetian Expo
- Dates: January 21-24, 2026
