ABOUT INVERIS™:

Headquartered in the Atlanta, Georgia area and celebrating its centennial in 2026, InVeris™ is a leading-edge technology company at the forefront of advancing human performance. With 100 years of innovation and performance data, InVeris provides the world's most complete live fire and simulation continuum, including Caswell™ Live Fire and fats® Simulation for Defense, Public Safety and Commercial markets. InVeris is a proven partner with more than 5,100 simulation training systems, 40,000 firearms simulators and 15,000 live fire ranges in deployment across 40+ countries. Only InVeris has everything it takes for people to make smarter, life-saving decisions second nature, instantly, accurately and safely. www.InVerisTraining.com

NEWS:

- SHOT Show kicks off the InVeris Centennial Celebration, "100 Years: Imagine What's Next"
 - While the InVeris name is relatively new, our 100-year heritage is not. So, as we honor the Caswell, fats® and Meggitt brands that built us, we celebrate a legacy of non-stop invention, never standing still, being on the forefront of tomorrow and earning your trust – from the world's first target retrieval system in 1926, to the world's first firearm that interacts with a video scenario in 1985, to today's only true continuum to advance human performance. As we celebrate our Centennial, we continue the legacy and look forward to what's next.
- Caswell Live Fire Announces Spin-Off from InVeris
 - Caswell Live Fire, the leader in shooting range design, development and service, [announced its official spin-off from parent company InVeris on Jan. 12](#). This empowers Caswell Live Fire to focus exclusively on its core strengths and the evolving needs of its customers. Caswell Live Fire will continue to deliver cutting-edge products, unmatched service, and innovative solutions, while exploring new partnerships and opportunities for growth.

IN THE BOOTH:

Train As One: The full continuum of live fire and simulation solutions by InVeris will be on display in SHOT Show booth #12454.

For our **Defense partners**, our focus is on mission readiness by providing cutting-edge live fire and simulation solutions. Our fats® Simulation systems offer a seamless blend of virtual environments and real-world scenarios, enabling troops to hone their marksmanship, engagement skills, and tactical decision-making abilities in a safe and controlled setting. To be truly mission ready, our defense partners move to the experience gained from the Caswell Live Fire products and solutions.

For our **Public Safety partners**, InVeris empowers public safety officers with the training they need to effectively navigate the challenges of their profession and ensure they are prepared to protect and serve their communities with the highest level of proficiency and safety, with its Caswell Live Fire and fats Simulation family of products.

Our **Commercial partners** benefit from our century of Caswell range innovations to help elevate their shooting businesses, including target carriers, bullet traps, shooting stalls, ventilation systems, and more for indoors and out. InVeris brings unparalleled expertise in gun range design, development, installation and support. Also, our fats® Simulation family of products and solutions can be adapted to the commercial market - giving range owners the ability to offer a blend of live and virtual training experiences.

For Fun! In a showcase of our innovative AR solutions, InVeris will be encouraging show attendees to shoot virtual skeet in our booth with our BlueFire™ weapons in a fully immersive virtual environment.

ALSO IN THE BOOTH:

- **fats® AR** — immersive tools for judgmental scenarios, training, and situational awareness under realistic conditions.
- **BlueFire® weapon simulators & accessories** — high-fidelity wireless weapons, flashlight / chemical spray modules, and more to deepen realism with safety and after-action transparency.
- **fats® LIVE** — a hybrid training platform that fuses virtual scenario projection with real firearms, enabling dynamic, data-rich, live-fire exercises.
- **fats® 100MIL Simulator System** — provides unparalleled weapons training capability with progressive features such as advanced game engine, 3D Marksmanship, enhanced diagnostics with intelligent Automatic Coaching and VBS3-based Collective training.
- **XWT Lite Target System for Live Fire Ranges** — for the range owners that want all the advantages of the industry's most robust and reliable target carrier but don't require the turning target head.
- **XWT Wireless Target Carrier for Live Fire Ranges** — the industry's first wireless, 360° turning target retrieval system, and advancements to the carrier continue.
- **RangeMaster™ Live Fire Range Management System** — an easy-to-use range control system offering instructors and range personnel the ability to write, store and run training scenarios.
- **QuikTurn™ 360 Turning Target System** — designed for random and concealed placements throughout an indoor or outdoor live-fire range.
- **Portable LOMAH Lightweight Scoring Target System** — a lightweight, electronic scoring target system that adds an adjustable base, power pack, Wi-Fi radio, and an optional self-healing static target to the proven InVeris LOMAH bar.
- **GranTrap™ Rubber Bullet Trap** — InVeris provides turnkey shooting range design, equipment and installation, and the logistic support necessary for today's fast-paced training environments. The GranTrap is a self-supporting trap assembled entirely by mechanical fasteners. The overtrap replenishment bin is part of the GranTrap's frame support assembly and does not require overhead support via chains/cables, bridging or rear wall attachment. No on-the-job cutting or welding is required for assembly. InVeris can help determine the GranTrap™ model to best meet a clients' range needs.

SPECIAL EVENTS:

- **Tuesday, January 20, 5:30 pm:** Join the InVeris team for a reception celebrating 100 years at the booth (12454)
Meet members of the InVeris team and special guests (to be announced), and have the opportunity to speak with experts about the latest InVeris technology.
Please contact Jillian Chertok to schedule interviews (jillian@barberwarren.com; 631-807-2082).
- **Thursday, January 22, 9:30-10:30 am: LEEP Forward (Law Enforcement Education Program)**
InVeris Presents: Building Safer Schools and Communities: Crisis De-Escalation and Active Shooter Response Training
Speaker: Chief Ronald Applin, Atlanta Public Schools Police Department
Lido 3004, LE16

Session Overview: This course empowers law enforcement professionals to collaborate effectively with schools and communities to prevent violence, manage crises, and respond decisively to active shooter threats. Participants will gain practical skills and strategies to strengthen safety partnerships and protect lives.

What You'll Learn:

- Crisis Intervention Support: Proven techniques to assist educators in calming students and parents during high-stress situations.
- Active Shooter Response Integration: How to align school safety protocols with law enforcement strategies for rapid, coordinated action.
- Immersive Training Technology: Hands-on experience with realistic, scenario-based simulations to enhance decision-making and communication under pressure.
