

INDUSTRIAL SEWING & MANUFACTURING SOLUTIONS

WE SUCCEED WHEN OUR CUSTOMERS SUCCEED

Red Fox Innovations is a premier name in the cut & sew contract manufacturing industry and offers a wealth of experience and capabilities. Our customers range from large public companies to start-ups. We manufacture medical devices, Berry Compliant military products, outdoor retail products, consumer goods, and more. We pride ourselves on our high-level customer service, accountability, and the quality of our work.

EXPERTISE IN

Medical Devices

- Cut & sewn medical device contract manufacturing is at the core of what we do. Our facilities are FDA Registered and ISO 13485 Certified.

Military/Government

- With specialized equipment and our scale, we can support production contracts requiring Berry Compliance for US Government business.

Outdoor/Retail

- We are proud to offer USA manufacturing to specialty and outdoor retailers that value USA Manufacturing!

Contract Cutting and Sewing

- We offer comprehensive in-house material processing with capabilities such as multi-ply cutting, laser cutting, die cutting, and more. After cutting, your products move seamlessly into our sewing department, where hundreds of sewing machines – including advanced automated systems – deliver efficient, high-quality production.

RF Welding

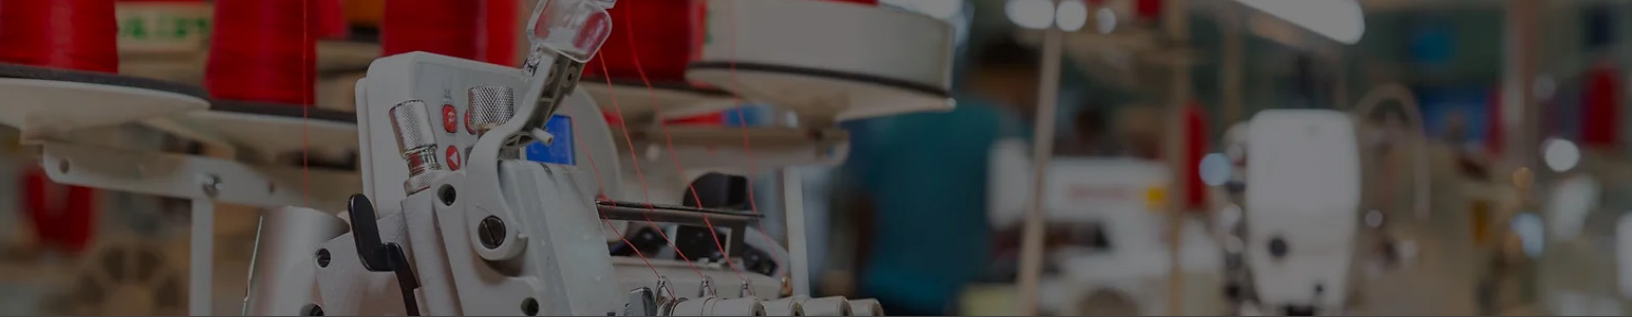

- Create fully-sealed, functional or waterproof products using our RF welding contract services. We have large format and high power machines capable of a wide variety of applications.

Product Development

- We are experts in material sourcing, prototyping and development, Design for Manufacturability (DFM), value-engineering, patterning/CAD design, and more!

PRECISION AND INNOVATION IN MANUFACTURING

OUR CAPABILITIES INCLUDE:

- Industrial Sewing
- Automated Cutting
- Fabric Welding and Sealing
- Material Sourcing & Supply Planning
- Product Design & Development

At Red Fox Innovations, we specialize in industrial sewing and advanced fabrication technologies. Our wide range of equipment supports everything from simple manual assemblies to high-volume, repeatable production using large-format automated sewing systems. We manufacture thousands of unique products annually and millions of units per year—each built by experienced operators focused on exceptional quality.

We employ modern multi-ply cutting systems for accurate, cost-effective large-scale cutting. Our high-powered

CO₂ laser cutting capabilities support precision textile cutting, edge sealing, etching/engraving, plastics processing, and more. We also design and source custom die tools and use in-house die presses for efficient, dimensionally consistent repetitive shape cutting.

Red Fox Innovations also offers comprehensive in-house fabric welding capabilities, including small- and large-format Radio Frequency (RF) welding, ultrasonic welding, and hot-air welding. We are one of the few large-scale U.S. contract manufacturers providing expert cutting, sewing, and fabric sealing—entirely in-house and made in the USA.

We maintain strong relationships with a broad network of domestic and international suppliers. We efficiently source required materials—including

Berry-compliant and latex-free options—along with high-quality textiles, buckles, webbings, zippers, hook-and-loop fasteners, custom laminates, brand embellishments, and advanced closure systems. We proudly build products to our customers' specifications without material substitution.

Need help with product development? From concept and prototyping through full-scale production, Red Fox Innovations is a trusted partner. Unlike standalone design firms, we design with manufacturing in mind and build at scale every day. We excel in Design for Manufacturability (DFM), value engineering, and standardization—bringing products from idea to production efficiently, under one roof, while meeting your critical requirements.
