

ACCURACY AND SUPPRESSION EVOLVED

We are **SWS Rifles**, North America's premier integrally suppressed barrel manufacturer, proudly based in Texas. We specialize in milling high-quality integrally suppressed baffle stacks, cut directly into customer-chambered barrel blanks.

Additionally, we can chamber and build our integral barrels to meet your specifications for your products. With a history of successful industry collaborations, we are eager to form new partnerships that advance firearm technology. At SWS Rifles, we are dedicated to crafting only the quietest, most accurate shooting experiences.
