Keyport Debuts Versa58 at SHOT Show 2026; Showcases Next-Gen Modular EDC Ecosystem

Las Vegas, NV — Keyport, the pioneer in modular everyday carry (EDC) solutions, today announced its attendance at SHOT Show 2026 to showcase its award-winning modular lineup and debut **Versa58**. Versa58 is a **58mm modular pocket carry system** that introduces new tools and fidget-friendly functionality across keychains, pocket setups, and compatible **58mm Swiss Army multitools**. The highly anticipated ecosystem will debut for live demonstrations at **Booth #41267** ahead of its [Kickstarter launch](#) on **January 20, 2026**.

At a Glance: Keyport at SHOT Show 2026

- **Where is Keyport located at SHOT Show?** Visit us at **Booth #41267** and in the **SHOT Show New Product Center**.
- **What is Versa58 by Keyport?** Versa58 is a patent-pending **58mm modular pocket carry system** designed to expand the utility of compact everyday tools through a flexible, reconfigurable platform.
- **When is the Versa58 Kickstarter Launch?** The [Versa58 Kickstarter](#) launches on **January 20, 2026, at 10:00 AM PT**. The crowdfunding campaign will run for 30 days, with shipping estimated to begin in August 2026.
- **What makes the system unique?** Versa58 features innovative **MagMounts** (magnetic quick-connect) to build standalone mini multi-tools and keychain setups as well as a proprietary **Interface Plate** to add those same scales and modules to any **58mm Swiss Army Knife with plastic (Cellidor) scales**.

Designing for Change, Not Certainty

“Most everyday carry products assume life stays predictable. It doesn’t,” said **David Cooper, President of Keyport**. “Our Keyport product ethos is built on a simple idea: we design **everyday carry for change, not certainty**. Because the best gear is not the flashiest. It is the gear that still works when plans change and contexts shift.”

Versa58 represents the next evolution of this philosophy, extending modularity into the widely used **58mm pocket tool format**. By utilizing a proprietary Interface Plate, Versa58 allows users to add modules to any 58mm Swiss Army multitools with plastic scales without permanent modification, ensuring the tool remains intact, reversible, and true to its original design.

Featured Innovations on Display

“The 58mm format is iconic because it gets so much right,” said **Josh Downes, Founder and Chief Designer of Keyport**. “Versa58 builds on that foundation by adding flexibility. Instead of a fixed configuration, we designed a system that lets people build, swap, and refine their carry over time while continuing to use the tools they already know and trust.”

Versa58 scales and modules are engineered to function as standalone tools via the **MagMount** system or to complement compatible **58mm Swiss Army multitools** with plastic scales - all without permanent modification.

At SHOT Show, Keyport will demonstrate the Versa58 system and a broad selection of modular components, including:

- **Pocket Flare Mini Flashlight:** A flat, ultra-compact mini LED flashlight with low beam, high beam, and a distinctive **lamp mode**
- **Mini Pen (Aluminum or Titanium):** A premium ballpoint mini pen utilizing replaceable premium German-made Troika refills.
- **USB-C 3.0 Flash Drive:** Integrated digital storage available in 64GB or 256GB capacities.
- **Clip Scale (Aluminum or Titanium):** A first-of-its-kind clip scale for compatible **58mm Swiss Army multitools** that adds a **true pocket clip** while preserving access to the accessory slot and keychain loop.
- **MagMounts and Interface Plates:** The “connective tissue” for building standalone tools, keychain tools, and **modular pocket setups**.

Disclaimer: Keyport is not affiliated with or endorsed by **Victorinox AG** or any of its trademarks, including **“Swiss Army.”** Versa58 is a patent-pending Keyport platform designed to work independently or to complement compatible **58mm Swiss Army multitools.**

A Legacy of Modularity

With nearly two decades of experience building **modular carry solutions**, Keyport has established itself as a category leader, developing a wide range of versatile products that allow the user to adapt their gear to their evolving needs and lifestyle. In addition to Versa58, **Keyport** will showcase its core modular everyday carry lineup, including:

- Keyport [Slide and Pivot](#): The ultimate **modular key organizers** that replace bulky keychains with a streamlined, silent carry.
- [Anywhere Tools](#): A stackable system of **pocket-sized essentials** that snap together for a custom tool-kit.
- [Escape Tool](#) : A high-performance **auto emergency multi-tool** featuring a seatbelt cutter and tungsten carbide window breaker, built for peace of mind on the road.
- [KeyportID](#): Privacy-first **lost-and-found recovery service** that connects owners with their lost items without exposing personal data.

About Keyport

Keyport develops **highly customizable everyday carry platforms** built for a world that never stays the same. Our system integrates keys, tools, tech, and a privacy-first lost-and-found service into a **single, pocketable solution that reconfigures in seconds.** From boardroom to backcountry, Keyport products are designed for modern life, keeping everyday carry organized, adaptable, and ready for change. The company has been featured by national and international media including **Discovery Velocity’s Tech Toys 360, RECOIL Magazine, Military.com, Forbes, CNN, and WIRED.**
