FOR IMMEDIATE RELEASE

Adaptive Tactical Launches New ARKUS™ Rifle Accessories at SHOT Show 2026

Designed and manufactured in the USA, the ARKUS line delivers rugged reliability and shooter-focused comfort for long-term performance in real-world environments.

Nampa, Idaho (2026) – Adaptive Tactical, LLC is proud to announce the official launch of the **ARKUS™ line of** firearm accessories, debuting January 2026. The new ARKUS lineup includes the **ARKUS AR Stock**, **ARKUS AR Grip**, and **ARKUS Adjustable Ruger® 10/22® Stock**, all designed and manufactured to deliver years of reliable performance in demanding conditions.

The ARKUS line represents Adaptive Tactical's latest evolution in Made in USA reinforced polymer design, with each product intentionally over-constructed to withstand hard use while maintaining shooter comfort and ergonomic control. Built for real-world applications, ARKUS products are ideal for duty, training, sporting, and recreational use.

The **ARKUS AR Stock** is engineered for AR15 and AR10 platforms utilizing Mil-Spec extension tubes. Constructed from high-impact, reinforced polymers, the stock delivers a solid, comfortable cheek weld and dependable lockup for consistent performance in the field. Its rugged construction

ensures long-term durability without unnecessary complexity.

The **ARKUS AR Grip**, designed for AR15 platforms, features an ergonomic ambidextrous profile that enhances control and comfort during extended use. Built from reinforced polymers, the grip is designed to perform in all conditions while providing a confident, secure feel for shooters of all experience levels.

Rounding out the lineup is the **ARKUS Adjustable Ruger® 10/22® Stock**, a versatile lightweight rimfire solution designed to fit **any barrel size**. Its adaptable design allows users to configure their rifle without the need for multiple stock options, making it an ideal upgrade for both new and experienced rimfire shooters.

“The ARKUS line was developed with durability and longevity as the priority,” said Gary Cauble, Vice President of Sales and Marketing at Adaptive Tactical. “These products are intentionally overbuilt, using reinforced polymers to ensure they hold up to years of real use. ARKUS is about reliability, comfort, and confidence—whether on the range or in the field.”

All ARKUS products will be showcased beginning at SHOT Show 2026 with **retail-ready packaging** and are available with **dealer, distributor, and law enforcement pricing**. The ARKUS line is designed to provide strong retail appeal while maintaining the performance standards Adaptive Tactical is known for in the industry.

Dealers, distributors, and industry partners are invited to preview the ARKUS lineup at **SHOT Show Booth #70227 in the Caesars Forum**. New and existing Adaptive Tactical products are available on updated 2026 price lists.
