S30 Ultrasonic Gun Cleaner

The Most Capable Compact Industrial Ultrasonic System for Rifles, Shotguns & High-Volume Gun Parts

The new and improved S30 is the most compact and cost-effective industrial-grade long gun ultrasonic cleaner on the market — purpose-built for professionals and serious firearm users who demand uncompromising performance. Designed to clean rifles, shotguns, pistols, and high-volume firearm components up to 31" in length, the S30 features two fully welded tanks with independent drain valves and a unified control panel for heat and ultrasonics. Its redesigned chassis stands just 15.5" tall, offering Pro Series-inspired performance in a highly space-efficient footprint. Pre-plumbed for an optional filtration system, the S30 is built with upgrade potential in mind. Whether you're running a gunsmithing bench, servicing an armory, or managing bulk firearm maintenance, the S30 delivers serious industrial cleaning power at a game-changing price point.

***Overall System Dimensions
35" L x 16" W x 15.5" H***
