MEET THE **H2**

The H2 represents the next evolution of the Phoenix Trinity lineup—where precision engineering meets bold, refined design. Sculpted, high-impact slide cuts create a striking visual signature while enhancing performance through a matched compensated barrel system designed to keep the pistol flat and controllable. Offered in 9mm, the H2 can be configured by dealers with either a sight block barrel and/or a hex port comped barrel, allowing for a tailored shooting experience. Finished with Phoenix Trinity's aggressive EVO grip for confident, consistent control, the H2 delivers composure, balance, and reliability under demanding conditions. Purpose-built for discerning shooters, the H2 performs with authority—and does so with unmistakable style.
