

TactNib is a technology company focused on transforming the target-shooting experience by providing an ecosystem that collects performance data and delivers actionable insights.

TactLog is a **FREE** non-monthly subscription, AI-driven mobile application crafted for shooters. It allows users to log, analyze, and enhance their target practice sessions.

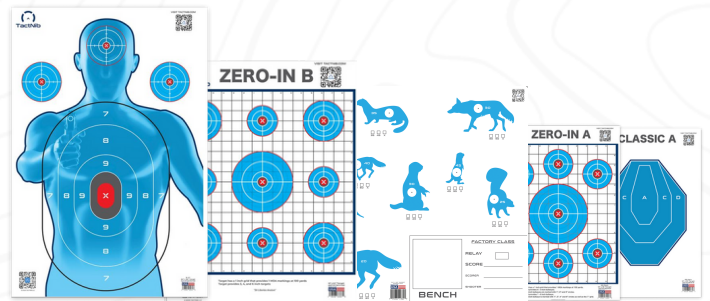

Our paper targets are available in packages of 25 on **Amazon** and can be purchased in bulk at our website: www.tactnib.com

12"x18"

Looking ahead to 2026, we plan to develop new features, including a community forum for support with products like paper targets and the **TactLog** app. We will also support clubs and competitions, starting with a leaderboard for shooting performances.

TactRange is set to launch in 2026, aiming to support gun ranges and attract more customers.
