ABOUT THE FDA

FDA is responsible for protecting the public health by assuring the safety, efficacy and security of human and veterinary drugs, biological products, medical devices, our nation's food supply, cosmetics, and products that emit radiation.

FDA is also responsible for advancing the public health by helping to speed innovations that make medicines more effective, safer, and more affordable and by helping the public get the accurate, science-based information they need to use medicines and foods to maintain and improve their health. FDA also has responsibility for regulating the manufacturing, marketing and distribution of tobacco products to protect the public health and to reduce tobacco use by minors.

Finally, FDA plays a significant role in the Nation's counterterrorism capability. FDA fulfills this responsibility by ensuring the security of the food supply and by fostering development of medical products to respond to deliberate and naturally emerging public health threats.

ABOUT CFSAN

The Center for Food Safety and Applied Nutrition, known as CFSAN, is one of six product-oriented centers, in addition to a nationwide field force, that carry out the mission of the Food and Drug Administration (FDA).

OUR MISSION

CFSAN, in conjunction with the Agency's field staff, is responsible for promoting and protecting the public's health by ensuring that the nation's food supply is safe, sanitary, wholesome, and honestly labeled, and that cosmetic products are safe and properly labeled.

Conveniently located near University of Maryland–College Park, CFSAN offers potential employees a competitive federal benefits package. CFSAN employees enjoy benefits such as: annual leave, sick pay, a competitive student loan repayment program, paid federal holidays, competitive salary, a retirement pension program, opportunities for training and continuing education. CFSAN is committed to employees work/life balance and offers employees alternative work schedules, telework/telecommuting, on campus nursing station, café and a gym. CFSAN employees also enjoy job security in insecure times.

WHAT WE DO

CFSAN employees provide services to consumers, domestic and foreign industry; agency administrative tasks; scientific analysis and support; and policy, planning and handling of critical issues related to food and cosmetics. The Center has over 800 employees who range from highly specialized professionals such as chemists, microbiologists, toxicologists, food technologists, pathologists, molecular biologists, pharmacologists, nutritionists, epidemiologists, mathematicians, sanitarians, physicians and veterinarians to secretaries and other support staff.
